

Formistic

Smart Contact Forms for WordPress Leads

Professional submission operations for WordPress: form capture, inbox management, replies, analytics, automation, and AI-assisted workflows.

User Guide v1.5.2

Published by Wordpressistic Organization

1. Overview

Formistic is a professional submission operations plugin for WordPress. It centralizes form capture, inbox management, replies, analytics, automation, and AI-assisted workflows in one admin experience.

Primary URL:

<https://www.wordpressistic.com/marketplace/plugins/formistic/>

2. Quick Start

1. Install and activate plugin.
2. Go to **Formistic** in wp-admin.
3. Open **Settings** and configure General + Spam first.
4. Add shortcode [wpistic_contact_form] to a page.
5. Submit a test entry and verify it appears in **Inbox**.

3. Forms

3.1 Default Form

Use:

```
[wpistic_contact_form]
```

Optional attachments:

```
[wpistic_contact_form upload="1"]
```

3.2 Custom Builder Form

1. Go to **Formistic > Forms**.
2. Create fields and publish.
3. Use shortcode:

```
[wpistic_form id="123"]
```

4. Inbox Workflow

4.1 Status flow

- new -> read -> replied

4.2 Daily team process

1. Filter by new.
2. Open details and verify fields/files.
3. Reply from modal (template or custom).
4. Add internal notes/tags if needed.

5. Reply System

Features:

- To/CC/BCC
- Template insert
- Quote original message
- HTML mode
- Signature append
- Reply history log

6. Spam Protection

Enable any/all:

- Honeypot
- IP rate-limit
- reCAPTCHA v3
- Turnstile
- Akismet
- IP blocklist

Recommended baseline:

- Rate limit ON
- Honeypot ON (default)
- One captcha system ON

7. Attachments

- Configure allowed extensions and max MB.
- Files are stored in protected directories.
- Downloads are served through authenticated endpoint.

8. GDPR

Supports:

- Consent checkbox
- WordPress personal data export
- WordPress personal data erasure
- Auto-purge policy (retention days)

9. Webhooks

1. Enable Webhooks in settings.
2. Add endpoint URLs (one per line).
3. Add signing secret (optional).
4. Use test dispatch button.

Replay options are available per submission in details modal.

10. Analytics

Dashboard includes:

- Last 30 days volume
- Today count
- Replied rate
- Average and P50 reply time
- SLA overdue (24h)
- Conversion by form

11. AI & Automation

11.1 Provider options

- Local Rules (free)
- Ollama (local)
- OpenRouter
- HuggingFace
- Custom endpoint

11.2 Training data

You can train contextual behavior with:

- FAQ text
- Knowledge base text
- Google Sheets published URLs
- Plain text file/URL sources

11.3 Automated replies

Rule syntax:

keyword => reply template

Template placeholders:

- {name}
- {site_name}
- {site_url}

12. Recommended Production Configuration

1. Set From Name/Email correctly.
2. Add signature.
3. Enable one anti-spam captcha provider.

4. Configure webhook + signing.
5. Set GDPR retention.
6. Add at least 5 automation rules for high-frequency intents.

13. Troubleshooting

Submission not appearing

- Check capture toggles in Settings > Captures.
- Confirm nonce/captcha validity.

Emails not sending

- Verify WordPress mail transport (SMTP plugin recommended).
- Test From Email and Reply settings.

AI draft empty

- Check provider config endpoint/model.
- Test with Local Rules fallback mode.
